Notes :

1. Frames are constructed with 150 x 38mm flanges for duct-to-duct mounting.
2. Drawing indicates width up to 900mm only. Damper nominal width exceeding 900 mm are supplied with intermediate mullion
3. Number of blade varies with height of the damper. Damper height exceeding 300mm supplied in multiple blades.
4. For blade within casing, damper depth varies with damper height.

Special Instructions :

1. Damper must be installed at a required distance from the fan depending on the fan speed. With fan of 1440 r.p.m, damper must be installed at least 1.5 equivalent diameter downstream of the damper while with 2880 r.p.m fan 4 equivalent diameter. Heavy duty construction damper must be used if above conditions cannot be met; please consult factory.
2. Damper is designed for connection to duct, if installation on wall is required, order the damper with sleeve.
